Required Windows user rights
- Admin rights (full access) required for: W.EASY installation folder
- Writing authorization: Windows registry

Further Software:
Following further software is required to be able to use the complete range of functions of the W.EASY software:
- Acrobat Adobe Reader (from Version 8 on)
- Microsoft .NET Framework 3.5

Further Requirements
Computer: fully operative i.e. absolutely no hardware conflicts and/or missing driver installations for hardware components of the computer are existing.

Kindly note that we don't offer any technical support for customer-own-hardware. By the use of our input devices the diagnostic tool is operational immediately.

The robust Getac S410 is especially adapted for the W.EASY diagnostic software and is therefore recommended by WABCOWÜRTH.

* Is required for license updates, updates and to use important functions
